Discover the power of enzymes

**pberum cosmeceuticals** contain -as active ingredients-the first recombinant enzymes of bacterial origin that provide visible and long-lasting results from the first application.

This innovative treatment is the result of many years of biotechnological research in the cosmetic and pharmaceutical industry, and is a natural and safe alternative to classic chemical molecules used in cosmetic procedures.

Our products have been developed based on four enzymes:

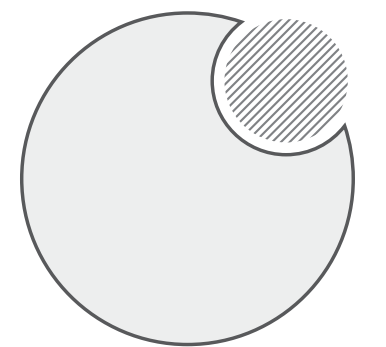

**Collagenase:** Firms and smoothes the skin.

**Hyaluronidase:** Drains fluid and toxin-retained areas.

**Lipase:** Eliminates accumulated fat and helps remodel the body contour.

**Keratinase:** Boosts cell renewal and allows other active ingredients to better penetrate the skin.

pbserum has four different product lines for various face and body applications.

# Facial

The only smart enzymatic treatment based on Keratinase.

 Acne breakouts and scars, photodamage

 Wrinkles, dry and dehydrated skin

 Hyperpigmentation and dull skin

 Oily, acne-prone and enlarged pores

 Facial flaccidity, loss of elasticity and wrinkles

# Plus

Palpebral bags

Double chin and jowl

Adipose accumulations in arms, back, abdomen, hips and legs

Flaccidity and stretch marks

Scars

Cellulite and fibrosis

# Body

Boost the efficacy, make it enzymatic.

Adipose accumulations in arms, back, abdomen, hips and legs

Flaccidity and stretch marks

Cellulite and fibrosis

Scars

Fluid retention

## Easy Touch

First line treatment before, during and after any enzymatic procedure.

Product line for daily, at home use, designed to prolong the results of any enzymatic cosmetic procedure.

## The best option in cosmetic procedures

- It provides visible and long-lasting results from the first application.
- Biotechnological actives, an alternative to chemical products.
- High purity lyophilisates without preservatives, perfumes or additives.
- No animal testing.
- A safe procedure, without any side effects.
- Skin friendly; does not cause irritation.

## ¿How is it applied?

The **pbserum** enzymes can only be applied by health professionals.

The right treatment and application method will be defined along with your doctor, depending on your skin needs and preferences. Some application options are:

Manually

Micropunctures

Used in synergy with devices such as electroporation, laser, radiofrequency or ultrasound

## How often is it applied? In how many sessions?

The frequency and number of sessions is determined together with your physician, however, we recommend the following for each product line:

Frequency	Number of sessions
Weekly	4* to 10
Every 2 weeks	Minimum 3
Weekly	8* to 10
Daily (at home)	Before, during and after any enzymatic procedure.

\*Minimum recommended sessions

## About Us.
